SUMMARY

Game Developer & Technical Artist with a track record of designing, building and publishing mobile 3D games across puzzle, action RPG and simulation genres. Specialized in Unity 6, C#, shader programming, gameplay physics, performance optimization and mobile store deployment. Open for Game Development & Technical Art roles.

EXPERIENCE

Gameplay Programmer & Technical Artist — Self-Published Mobile Titles

2023 — Present

Designed, programmed and shipped four 3D mobile titles on Google Play and APKPure (500k+ organic downloads) — owning gameplay code, physics, custom shaders, performance optimization and store deployment end-to-end.

Freelance Game Developer & Technical Artist — Freelance / Contract Work

2021 — 2023

Built custom shaders, particle VFX, ragdoll physics solvers and mobile URP render pipeline optimizations for client prototypes and indie teams, targeting a locked 60 FPS on low-end to flagship devices.

Unity Game Programmer — Independent Projects & Game Jams

2019 — 2021

Developed state machines, touch gesture input handlers, level progression systems, audio pipelines and Google Play SDK integrations across personal projects and collaborative game jams.

PUBLISHED GAMES

Color Flow Puzzle

Google Play · 4.8★ · 500+ levels · 60 FPS locked

Relaxing color-flow logic puzzle with real-time line rendering and haptics.

`Unity 6` `C#` `Shader Graph`

Supermarket Journey

Google Play · 3D tycoon sim · solid 60 FPS

First-person store management with NavMesh customer AI and box physics stocking.

`NavMesh AI` `URP` `Blender`

Survival Hero: Action RPG

Google Play / APKPure · 200+ on-screen entities at 60 FPS

Fast-paced roguelite with object pooling, crowd AI and elemental skill combos.

`Unity 6` `Object Pooling` `Shuriken VFX`

Prison Escape Journey Simulator

Google Play · 60+ stealth quests · custom occlusion shaders

Stealth sandbox with vision-cone shaders, ragdoll physics and multi-route level design.

`HLSL` `Ragdolls` `Cinemachine`

SKILLS

Gameplay & Engines: C# & Unity 6, C++ & Unreal Engine 5, Godot 4 / GDScript, Three.js / WebGL

Graphics & Art: HLSL / GLSL cel-shading, Blender 3D stylized art, VFX & particle systems

Physics & AI: Ragdolls & joints, NavMesh pathfinding, behavior trees / HFSM

Audio: FMOD adaptive music, spatial audio occlusion

Pipelines: Git LFS, SteamPipe deployment, multi-platform packaging

Design: Level design, puzzle gating, pacing & camera choreography
